MODULES & COVERAGE

Every week, we cover a different number of chapters in each module. Each module folder contains Module Instructions at the beginning, links to items with due dates, and Learning Objective-Module Activity table at the end.

Each chapter folder includes several of the following items:

1. **Material to skip in the chapter**. This is important, because I may not cover everything in a chapter.
2. **Slides (in pdf)** that summarizes the key concepts in the chapter. They are not meant to replace reading the chapter. **Narrated slides** are also available. Both are over covered material i.e. skipped material is not included. I also included **Videos from companies** I found on the web to illustrate a lot of the concepts we cover in the real world.
3. **Practice Problems (PPs)** from the end of the chapter and their solutions. These problems are not to be turned in. They are for you to practice solving them after you go through chapter and examples given. Note that sometimes the solutions match the book method and not my voice over method. Select whichever method you like.
4. **A VOICE OVER Example of a problem and its solution in a video for difficult problems OR if I have an alternative way (usually I find easier) than the book method**. The solution is available as a pdf file you can print and use while watching the YouTube video.
5. **Narrated Excel and Guided Examples (GE).** These are good examples to show you how to solve problems by hand and in Excel. Excel is a prerequisite for this class, but it is not required to use in this class. However, Excel is an important skill upon graduation and will help you complete a lot of the problems for HW and Exams much faster than if you did them by hand.
6. **Sample Excel Example Solutions,** When available, these Excel solutions offer more examples to support the narrated Excel Examples. After watching the narrated videos, feel free to practice on the problems in Excel if you like. **Excel is not required for the course, but highly encouraged.**

REMINDER: Quizzes are ONLY on concepts. Homework and Exams are ONLY on problems. So adjust your studying habits accordingly (see syllabus for details).
